Tony Braschi

Rock Blues Experience

Since his nineteenth birthday, Tony Braschi has fueled the revelation of Italian Rock Blues, gaining the name "The Italian Johnny Winter". Yes, this is Tony Braschi! The powerful rock-guitarist and blues-singer sounds like an old American bluesman by his voice, and looks like the real twin of Johnny Winter when he picks up his guitar. He has worked with some of the best international bluesmen such as Herbie Goins, Buddy Miles and the percussionist Karl Potter. After publishing his first solo album "For All Of You" in 2003, he became a fantastic European attraction because of his incredible live performances. These are powerful and melodic blues (with some harmony singing), which at times, invoke the spirit of Bob Seger. Well written with a guitar that demands respect. An ample disc too, at almost 57 minutes. You'll dig this man's strength, as a performer.
